

The Nature of History

History is a record of the past. One would think that this is a perception of relative simplicity. It appears not to be; there are so many perversions of history. Much of the debate on viewing history, as the narrative construction of the historian, is whether this judgement distorts what history is, what historians do, and it reflects upon the objectivity and truth-seeking nature of the exercise. It is assumed in every historical narrative that form always follows content.
